

# How circularity will help us decarbonize

Marco ten Bruggencate

President Plastics Europe

"Circularity is the most important medium-term lever for a comprehensive transition of the industry by 2030."

Reshaping Plastics 2022 - SystemIQ

# Future-proofing the plastics industry in Europe - our actions

We have called for a target of **30% mandatory EU recycled content for plastics packaging** by 2030

Planned investments of **€7.2 billion** by 2030 in chemical recycling

We need to **work together** to improve the quality and quantity of **recyclates** along the value chain

# Getting to circularity faster together

## Upstream and downstream solutions can drive:

- **33% reduction** in GHG emissions
- **46% reduction** in waste disposal in the next decade and beyond.

Type meeting name and date (or delete this text).

We need a joined-up policy vision and certain framework which:

- **Incentivises strong** investment and innovation
- A strong and harmonised **EU Single Market**
- **Enables access** to high-quality and affordable feedstocks

# What's next for us?

- 
- **Roadmap for our industry**
  - **Serious collaboration and breakthrough partnerships**

Thank you
